

# III Hands-on International Course Parapharyngeal Space Surgery From lateral approaches to Transoral Robotic Surgery

**9-10 Nov 2023**

Faculty of Medicine. Universitat Autònoma de Barcelona.  
Unitat docent de ciències mèdiques bàsiques.  
Bellaterra. Barcelona.

# Organizer

ENT-Head and Neck Surgery Department Hospital Germans Trias

## Organizing Committee

**David Virós Porcuna**

Hospital Germans Trias. Badalona. Spain

**Carlos Pollán Guisasola**

Hospital Germans Trias. Badalona. Spain

**Constanza Viña Soria**

Hospital Germans Trias. Badalona. Spain

**Mar Palau Viarnès**

Hospital Germans Trias. Badalona. Spain

## Invited Faculty

**Miquel Quer Agustí**

Hospital de la Santa Creu i Sant Pau. Barcelona. Spain

**Jacinto Garcia Lorenzo**

Hospital del Mar. Barcelona. Spain

**Rosa Mirapeix Lucas**

Universitat Autònoma de Barcelona. Barcelona. Spain

**Armando De Virgilio**

Humanitas University. Milan. Italy

## III Hands-on International Course Parapharyngeal Space Surgery.

de Barcelona

# INTRODUCTION

Parapharyngeal space is a complex anatomic space of the head and neck where a heterogeneous group of tumors arise. Clinical management of these lesions has always been challenging, but in the last years it has evolved as a result of technological advances in diagnostic and treatment procedures. There are different key-points on radiology, pathology, and surgery which should be considered before proposing an optimal approach.

This course is aimed to discuss the state of art for the parapharyngeal tumors management through a two days' work, a theoretical one and a hands-on surgery second one.

Those surgeons who dominate the parapharyngeal space surgery can deal with most of head and neck surgeries due to the intricate anatomic area. We think this course will improve the surgical knowledge and skills of head and neck surgery specialists.

# THURSDAY NOV 9

**8.30-8.40 h Opening Remarks.** David Virós

**8.45-9.15 h Conference. Chairman:** Carlos Pollán  
**Parapharyngeal space anatomy.** Rosa Mirapeix

**9.15-10.30 Session I: Approaches to parapharyngeal Space: Surgical technique. Chairman:** Constanza Viña

**9.15-9.30 h Transcervical-Transparotid-Transmandibular approach.** Jacinto Garcia

**9.30-9.45 h Transoral robotic approach.** David Virós

**9.45-10 h Combined approach TORS plus Transcervical.**  
Carlos Pollán

**10-10.30 h Infratemporal approach.** Miquel Quer

**10.30-11 h Conference. Chairman:** David Virós  
**Transoral Robotic approach to parapharyngeal space: Systematic review.** Armando De Virgilio

11-11.30 Coffee Break

From lateral approaches to Transoral Robotic Surgery

A blue pyramid logo with a white outline. The pyramid is oriented with one vertex pointing upwards. The text "From lateral approaches to Transoral Robotic Surgery" is written in a circular path around the pyramid.

# THURSDAY NOV 9

## 11.30-13.30 Cadaver workshop

### Lateral approaches:

- Theoretical lectures
- Hands On sagittal formaline fixed cadaveric dissection

### Lateral dissection

### Transoral Robotic approach:

- Theoretical lectures
- DaVinci simulator training
- Hands-On fresh cadaveric dissection with DaVinci Xi

13.30-15.00 Light lunch

## 15.00-18.00 Cadaver workshop

### Lateral approaches:

- Theoretical lectures
- Hands On sagittal formaline fixed cadaveric dissection

### Transoral Robotic approach:

- Theoretical lectures
- DaVinci simulator training
- Hands-On fresh cadaveric dissection with DaVinci Xi

# FRIDAY NOV 10

**08.30-9.30 h Session II: Parapharyngeal space surgery Round**

**Table. Moderator: David Virós Porcuna.**

Panelists: Miquel Quer, Jacinto García, Armando De Virgilio, Carlos Pollán.

**9.30-10.30 Session III:**

**9.30-9.45 Dysphagia management approach to parapharyngeal space surgery patients.** Constanza Viña.

**9.45-10.00 Facial nerve management.** Emilio Amilibia.

**10.00-10.30 Retrospective analysis of surgery in prestyloid parapharyngeal tumors: lateral approaches vs transoral robotic surgery.** Mar Palau.

10.30-11.00 Coffee Break

# FRIDAY NOV 10

## 11.00-13.30 Cadaver workshop

### Lateral approaches:

- Theoretical lectures
- Hands On sagittal formaline fixed cadaveric dissection

### Lateral dissection

### Transoral Robotic approach:

- Theoretical lectures
- DaVinci simulator training
- Hands-On fresh cadaveric dissection with DaVinci Xi

13.30-15.00 Light lunch

## 15.00-18.00 Cadaver workshop

### Lateral approaches:

- Theoretical lectures
- Hands On sagittal formaline fixed cadaveric dissection

### Medial dissection

### Transoral Robotic approach:

- Theoretical lectures
- DaVinci simulator training
- Hands-On fresh cadaveric dissection with DaVinci Xi

# Contact

Otolaryngology and Head and Neck Surgery Departmental Secretary:

(+34) 93 497 89 54

**orl.germanstrias@gencat.cat**  
**cursorl.germanstrias@gmail.com**

## Fee

2000 €

### Registration includes:

Theoretical lectures

Meals

Dissection Guide

Second day Advanced Hands-On:

- Cadaveric formaline fixed sagittal cut head dissection.
  - Transoral robotic fresh cadaveric head with DaVinci Xi device.
- Gala dinner: Friday 10 November

## Bank Transfers

Account Holder: FUCAP

CaixaBank- "La Caixa"
